ACTIVE INGREDIENTS

DENVER CLAY (*Bentonite*): Promotes tissue detoxification, due to its mineral content.

ZINC OXIDE (*Zinc Oxide*): Maintains the balance of the hydrolipid film, preserving the skin's natural reserves and promoting a decongesting effect.

CALCIUM CARBONATE (*Calcium Carbonate*): As well as its decongesting properties, it retains and fixes moisture, acting as a moisturiser.

PROVSLIM™: Effective combination of two natural active ingredients (frambinone and fisetin), which act jointly on reducing fatty body tissue in any situation, including while resting, during exercise, and after eating, making it an active ingredient with an adaptive effect. Reduces cellulite, remodels the figure and improves skin elasticity, while reducing swelling and skin thickness.
