

My[B]CODE PERSONALISED BODY TREATMENT

A revolutionary concept, especially designed to prevent and combat the most common body problems (such as flaccidity, cellulite, excess volume, stretch marks and poor circulation,...) in a targeted manner. This personalised treatment uses a unique code that acts intensively according to the needs of the different parts of the body at any time.

Body concentrates formulated to create and customize the most suitable body treatment. Up to three different concentrates may be mixed together, designing the ideal combination to directly tackle the problem that needs treating.

“Controlled liquid retention with no surface tension.”

11 DRAINING CODE DRAINING CONCENTRATE

Ref: 10311

DESCRIPTION

Draining body concentrate that removes excess fluid retention and promotes the purification of the dermal tissue. Activates the microcirculation, reducing redness and capillaries. Ideal for people with obvious fluid retention or with signs of oedematous cellulite.

ACTIONS

- Drains.
- Decongests.
- Lipolytic.
- Regenerates.

ACTIVE INGREDIENTS

KOLA NUT EXTRACT (*Cola Acuminata Seed Extract*): Due to its high caffeine content, it is considered a metabolic stimulant, which enhances lipolytic activity and natural lipid conversion. Another important property of this plant extract is drainage, as it activates the skin microcirculation.

IVY EXTRACT (*Hedera Helix Extract*): Rich in flavonoids and hederagenin, which is the active ingredient that promotes the constriction and subsequent dilation of the blood vessels, it stimulates the microcirculation and drainage between tissues. Also has regenerative properties to improve the skin's firmness and elasticity.

ARNICA EXTRACT (*Arnica Montana Flower Extract*): It is credited with decongesting properties, thanks to its flavonoids, which increase the capillary blood supply, making it a very suitable extract for improving fluid retention.

CINNAMON LEAF ESSENTIAL OIL (*Cinnamomum Zeylanicum Leaf Oil*): Stimulates the metabolism and activates the microcirculation, helping to reduce superficial congestion.
