

**DERMACURE**  
EXPERT CELL RENEWALL  
PROGRAM.  
CHEMICAL PEELING

Is a comprehensive and advanced cosmetic chemical peeling system, exclusively for professional use, to accelerate cell renewal of the outermost skin layers, stimulating the rebirth of new skin free of imperfections, which regains all its splendour.

Immediate visible results. The skin is regenerated displaying a soft touch, a smooth texture, an even tone and a glowing appearance.

Combined formulas of chemical exfoliating agents, conceived to mitigate and accurately, safely, effectively correct specific skin alterations in a controlled manner.

*“Skin more tolerant with the barrier function restored.”*

100 ml / 3.38 fl.oz.

**ESSENTIAL CORRECTION PEEL \_SOFT  
COMBINED FORMULA CORRECTIVE PEEL  
FOR GENTLE AND PROGRESSIVE SKIN RENEWAL**

Ref: 10411

DESCRIPTION

Chemical peel. It restores a smooth skin, with a uniform tone and free of imperfections. Destined to correct imperfections in sensitive, sensitized, dry, tanned skin or phototypes up to IV, acne and hyperpigmentation problems.

ACTIONS

- Keratolytic
- Exfoliating
- Restorative
- Whitening
- Purifying
- Decongestive

ACTIVE INGREDIENTS

**AZELAIC ACID (*Azelaic Acid*):** Found in wheat and other cereals, reduces the skin irritation. It allows acne and hyperpigmentation to be improved in dark skin without causing hyper pigmentation post inflammation, decreasing melasma.

**LACTIC ACID (*Lactic Acid*):** Has a slow penetration and it is extracted from dairy products fermentation. It prevents blockage of the pilosebaceous follicles, promoting sebum expulsion and purifying action. It promotes the balance of water in the stratum corneum, restoring the skin's natural barrier. It favours the collagen production, enhancing a whitening and depigmenting effect.

**MANDELIC ACID (*Mandelic Acid*):** It is extracted from bitter almonds. Its slow absorption reduces the feeling of irritation, making it ideal for the skins affected by acne, rosacea and dark spots. Does not generate post inflammatory hyperpigmentation on dark skin photo types improving the depigmenting action.

COMPOSITION

ALCOHOL DENAT, LACTIC ACID, AQUA, MANDELIC ACID, AZELAIC ACID, DIPROPYLENE GLYCOL, HYDROXYETHYLCELLULOSE, SODIUM HYDROXIDE, BENZYL ALCOHOL.

DIRECTIONS FOR USE

Pour 4ml of the combineate formula into the measuring cup.

Apply the product to the treatment zone with the aid of the brush. Start the application from the forehead, following the sides until the chin and end in the central face zone.

The exposure time will depend on skin type, we must pay special attention to any skin reaction to neutralise it immediately with **DERMACURE POST-PEEL NEUTRALISING BALSAM**.

*TIP:* Apply **KISS ME A LOT** from **IN ONE'S POCKET** in the most sensitive areas (fins of the nose, labial mucosa, corner of the eye, lobe of the ear ...) by caution.
