

DERMACURE
EXPERT CELL RENEWALL
PROGRAM.
CHEMICAL PEELING

Is a comprehensive and advanced cosmetic chemical peeling system, exclusively for professional use, to accelerate cell renewal of the outermost skin layers, stimulating the rebirth of new skin free of imperfections, which regains all its splendour.

Immediate visible results. The skin is regenerated displaying a soft touch, a smooth texture, an even tone and a glowing appearance.

Combined formulas of chemical exfoliating agents, conceived to mitigate and accurately, safely, effectively correct specific skin alterations in a controlled manner.

“Skin more radiant, luminous, redefined and reaffirmed.”

100 ml / 3.38 fl.oz.

**AGE CORRECTION PEEL_FORTE
COMBINED FORMULA PEEL TO CORRECT
THE MOST VISIBLE AGEING SIGNS**

Ref: 10412

DESCRIPTION

Chemical peeling. It diffuses the relief of the lines of expression and wrinkles, the appearance of the dilated pores and the hyperpigmentation, stimulating the processes of neo synthesis of the fibres of collagen and elastin.

ACTIONS

- Keratolytic
- Exfoliating
- Restorative
- Anti-wrinkle
- Whitening

ACTIVE INGREDIENTS

LACTIC ACID (*Lactic Acid*): It is extracted from dairy products fermentation and it has a slow penetration. It removes dead cells bringing to the skin a whitening and depigmenting effect. It restores the skin's natural barrier.

PHYTIC ACID (*Phytic Acid*): Extracted mainly from seeds and pulses. It has an excellent antioxidant property, acts preventing FR action. It is also a whitening agent, blocking the entrance of iron and avoiding the enzymatic action during the melanogenesis.

GLYCOLIC ACID (*Glycolic Acid*): Extracted mainly from sugar cane. Penetrates deeply due to its low molecular weight, controlling one of the main problems of the ageing process, the cells activity decrease. It stimulates the collagen production and eliminates the hyperpigmentation because is capable to destroy the links between proteins, enzymes and amino acids interfering in the melanogenesis.

COMPOSITION

AQUA, LACTIC ACID, GLYCOLIC ACID, PHYTIC ACID, DIPROPYLENE GLYCOL, SODIUM HYDROXIDE, HYDROXYETHYLCELLULOSE, BENZYL ALCOHOL.

DIRECTIONS FOR USE

Pour 4ml of the combineate formula into the measuring cup.

Apply the product to the treatment zone with the aid of the brush. Start the application from the forehead, following the sides until the chin and end in the central face zone.

The exposure time will depend on skin type, we must pay special attention to any skin reaction to neutralise it immediately with **DERMACURE POST-PEEL NEUTRALISING BALSAM**.

TIP: Apply **KISS ME A LOT** from **IN ONE'S POCKET** in the most sensitive areas (fins of the nose, labial mucosa, corner of the eye, lobe of the ear ...) by caution.
