**ECC REMOVER MILK
FACIAL CLEANSING MILK**

Ref: 10451 / Ref: 10458

DESCRIPTION

Highly moisturising prebiotic facial cleansing milk. Completely melts away liposoluble impurities, such as make-up and facial sebum, without damaging the skin's natural pH balance or microbiome, which acts as a protective barrier against daily environmental oxidants. Enriched with moisturising hygroscopic active ingredients, which retain water molecules within the stratum corneum to prevent water loss and maintain the skin's optimal natural moisture level. Leaves a relaxing feeling of softness.

ACTIONS

- Cleansing
- Detoxifying
- Protecting

ACTIVE INGREDIENTS

BETA-GLUCAN: Prebiotic which stimulates the proliferation of the skin's protective flora, strengthening the natural barrier which protects the skin from environmental stress and improves skin immunity.

BETAINE: Just one molecule of Betaine can retain up to 10 molecules of water in the stratum corneum, so it maintains the skin hydration balance at high levels, reducing the feeling of skin irritation and dryness.

ALOE VERA JUICE (Aloe Barbadensis Leaf Juice): Removes accumulated dirt and oil from pores. Adds considerable renewing, moisturising and antioxidant power.

GLYCERINE: Plant origin. Penetrates the stratum corneum, where it captures and retains water molecules, preserving the skin's natural resources of hydration. It's a "hygroscopic" substance.

VITAMINS A, B and E (Beta-Glucan, Betaine and Aloe Barbadensis Leaf Juice): Antioxidant, renewing and protective action.
