

DERMACURE
EXPERT CELL RENEWALL
PROGRAM.
CHEMICAL PEELING

Is a comprehensive and advanced cosmetic chemical peeling system, exclusively for professional use, to accelerate cell renewal of the outermost skin layers, stimulating the rebirth of new skin free of imperfections, which regains all its splendour.

Immediate visible results. The skin is regenerated displaying a soft touch, a smooth texture, an even tone and a glowing appearance.

Combined formulas of chemical exfoliating agents, conceived to mitigate and accurately, safely, effectively correct specific skin alterations in a controlled manner.

“Skin with textured, density and natural shine, regenerated of marks and scars.”

100 ml / 3.38 fl.oz.

**SCARS CORRECTION PEEL
COMBINED FORMULA PEEL TO CORRECT
ALL KINDS OF MARKS ON THE SKIN**

Ref: 10413

DESCRIPTION

Chemical peeling. It inhibits the keratinization of the follicle avoiding its obstruction and contamination, improving the scars and marks that have been produced by acne breakouts or breakage of dermal fibres.

ACTIONS

- Keratolytic
- Exfoliating
- Restorative
- Purifying

ACTIVE INGREDIENTS

SALICYLIC ACID (Salicylic Acid): It is extracted from Willow Bark tree. It is capable to penetrate in the follicle, detaching dead skin cells from the inside, helping to keep the pores clean from dirt and cell remains.

AZELAIC ACID (Azelaic Acid): It is found in wheat and other cereals. It has a bacteriostatic effect that controls the bacteria action decreasing the inflammation caused by acne lesions. It also normalises the keratinisation process reducing acne scars.

GLYCOLIC ACID (Glycolic Acid): It is extracted mainly from the sugar cane. It prevents the pores obstruction incentivising the exfoliation and a subsequent regeneration, improves the dark spots and the scars thickness. Increases the skin moisture, very important to keep the cells healthy and balance sebum production.

MANDELIC ACID (Mandelic Acid): It is extracted from bitter almonds. It has a higher molecular weight than glycolic acid, which means that its penetration is slower and less irritant. It has a natural antibiotic action, activates the cell regeneration and prevents the post-inflammatory hyperpigmentation.

COMPOSITION

ALCOHOL DENAT, AQUA, GLYCOLIC ACID, SALICYLIC ACID, MANDELIC ACID, AZELAIC ACID, DIPROPYLENE GLYCOL, HYDROXYETHYLCELLULOSE, SODIUM HYDROXIDE, BENZYL ALCOHOL.

DIRECTIONS FOR USE

Pour 4ml of the combineate formula into the measuring cup.

Apply the product to the treatment zone with the aid of the brush. Start the application from the forehead, following the sides until the chin and end in the central face zone.

The exposure time will depend on skin type, we must pay special attention to any skin reaction to neutralise it immediately with **DERMACURE POST-PEEL NEUTRALISING BALSAM**.

TIP: Apply **KISS ME A LOT** from **IN ONE'S POCKET** in the most sensitive areas (fins of the nose, labial mucosa, corner of the eye, lobe of the ear ...) by caution.

AZELAIC ACID + SALICYLIC ACID

MANDELIC ACID + GLYCOLIC ACID
