PURITY ACNE RESCUE SERUM

- Salicylic Acid 2 %
- Niacinamide 0,1%
- Aloe 0,1%

*Mixed, impure and
acne-prone skins*

Format 30 ml

Cod. 1030020128

Anti-imperfection serum, indicated for the treatment of comedogenic acne (blackheads and whiteheads), pimples, dilated pores and hyperkeratosis. With 2% Salicylic Acid, it gently eliminates dead cells from the skin surface, penetrates the internal walls of congested pores, eliminating the keratin plug, purifying and decongesting them. In synergy with Niacinamide and Aloe, it regulates the production of sebum, has an antibacterial and soothing action and protects the skin from environmental aggressions (such as smoke, pollution and UV rays).

The product can also be applied on the back, the chest and the neck. For mixed, impure and acne-prone skin.

SALICYLIC ACID (BHA)

Performs an important keratolytic/exfoliating action, able to selectively break the keratin protein chain, dissolving fat and impurities that clog pores. It also has an anti-bacterial and anti-inflammatory action, thus preventing the formation of pimples, blackheads, whiteheads and other impurities that lead to an aggravation of the acne. BHA is indicated for oily skin prone to pimples, blackheads, whiteheads and hyperkeratosis. It stimulates cell renewal, giving brightness and firmness to the dermis.

NIACINAMIDE (VITAMIN B3)

Plays an important role in soothing and restoring the skin barrier. It is responsible for the production of ceramides and free fatty acids that form a protective layer on the skin that preserves hydration, avoiding dryness and flaking. It neutralizes the free radicals and protects skin cells from oxidative damage caused by pollution, sunlight and blue light. It stimulates cellular metabolism by increasing the production of collagen and elastin and counteracting the formation of wrinkles and the loss of tone. Anti-inflammatory and soothing, it is suitable for people suffering from acne, rosacea or redness. It has an important sebum-regulatory action, thus reducing the risk of pimples or clogged pores and shiny skin, maintaining the balance of the microbiome. It reduces discoloration by regulating the function of the cells that form the pigment, making the skin more compact and homogeneous.

ALOE VERA

Pure Aloe Vera extract with a soothing, refreshing and moisturizing action. It stimulates and accelerates the regeneration of cells in damaged tissues, promoting their healing. It acts as a natural antibacterial. Particularly rich in vitamin A B C E, minerals and other substances essential for the health of the dermis, it has an important regenerating, antioxidant, astringent, sebum-regulating and immunostimulant action. It counteracts oxidative stress thus blocking the physiological cellular aging process of the skin. It purifies impure and acne-prone skin, controlling excessive sebum production.

HYALURONIC ACID

It is one of the main components of human connective tissues. Thanks to its ability to attract and bind to itself a high number of water molecules, it guarantees deep hydration, resistance, structure and firmness of the skin.

DIRECTIONS FOR USE: Apply a few drops of the product on the area to be treated, morning or evening after AquaPure from the SkinSystem dermocosmetic line. Discontinue use if irritation occurs. Avoid contact with eyes. Beta-hydroxy acids (BHAs) can increase the skin's sensitivity to the sun. During the day, always apply sunscreen.
