ULTRA FILLING CREAM

Filler Face cream

Ultra Filling Spheres[™],
Reproage[®], Tocopherol

All Skins type

Format 50 ml

Cod. 1030020103

Moisturizing and plumping face cream. The synergistic action of the Ultra Filling Spheres[™] and Reproage[®] visually improves the appearance of the face giving compactness, elasticity and brightness, with immediate plumping effect. Effectively counteracts all signs of aging. For all skin types. Paraben, petrolatum, sulphate and alcohol free.

ULTRA FILLING SPHERES[™]

It is a low molecular weight hyaluronic acid and Konjac Glucomannan, a vegetable polysaccharide; subsequently these, through a particular process of union, dehydration and encapsulation, are transformed into Ultra Filling Spheres[™]. The two biopolymers in this innovative form are particularly hygroscopic and manage to incorporate a significant amount of water molecules from the deepest layers of the dermis for a long time, thus preventing them from evaporating. The effect obtained is an immediately smoother and plumped skin, face contour redefined, relaxation of expression wrinkles, attenuation of the deepest ones and a prolonged hydration over time.

HYALURONIC ACID

It is one of the main components of the connective tissue, it confers resistance and firmness to the skin. It penetrates deeply, recalls and retains a large number of water molecules up to 70 times its molecular weight, ensuring hydration, turgidity and plasticity, essential for the maintenance of young skin.

KONJAC GLUCOMANNAN

It is a vegetable polysaccharide with an excellent hygroscopic property; in fact, it is able to recall and retain water molecules up to 200 times its molecular weight thus ensuring prolonged hydration.

REPROAGE[®]

Innovative peptide that reactivates the regenerative potential of the epidermis, preventing the signs of skin aging and improving the appearance of mature skin. With age the regenerative capacity of the basal cells of the epidermis decreases with the consequent appearance of signs of skin aging: wrinkles, lack of elasticity and turgidity, opacity. Reproage reprograms the regenerative potential of cells at the epigenetic level: the result is a radiant and rejuvenated, smoother and more elastic skin. Reproage[®] slows the appearance of the signs of aging, rejuvenates mature skin, improving the look and brightness.

VITAMIN E

Vitamin E, thanks to its incredible antioxidant properties, is able to hamper the harmful effects of free radicals, main responsible of skin aging. Easily absorbable, it strengthens nourishes and protects the skin tissue, making it stronger and more elastic.

DIRECTIONS FOR USE:

Apply on cleansed skin morning and evening. During the day as a base for make-up and protection of the skin from photo-aging; in the evening as a nighttime regenerating.
