SYN-AKE

Dermo-cosmetic active ingredient of technological origin, derived from the whey of viper. It reduces the muscles contractions, responsible for facial expressions, smoothing and preventing expression lines and giving the face a more compact and defined outline.

ALLANTOIN

A fundamental molecule for the health of connective tissue. It exerts an important moisturizing and supporting action on the skin, improving tone and elasticity and thus preventing wrinkles appearance. It deeply nourishes and stimulates its physiological cellular self-regeneration, keeping it young over time.

Recommended also in the treatment of skin diseases, such as atopic and seborrheic dermatitis and in cases of skin pigmentation disorders, such as solar lentigo, senile lentigo and melasma.
