CORNFLOWER EXTRACT

Particularly rich in flavonoids and other antioxidants, it counteracts the harmful effect of free radicals by slowing down the tissues degeneration. Anti-reddening, soothing and decongestant, it stimulates the functionality of the microcirculation, regulating the permeability and protection of the capillaries' walls, preventing their fragility. Thus it is a valid adjuvant in the treatment of particularly sensitive skin affected by couperose

ALLANTOIN

A fundamental molecule for the health of the dermis. Rich in antioxidant, soothing, moisturizing and repairing substances, it protects the skin from the harmful aggressions of free radicals, preventing normal skin aging. It nourishes it in depth and stimulates its physiological cellular self-regeneration, keeping it young over time.

ALOE VERA

Aloe Vera, particularly rich in A B C E vitamin, minerals and other substances essential for the health of the dermis, plays an important moisturizing, regenerating, antioxidant and immunostimulatory action.

HYALURONIC ACID

In this special formulation, hyaluronic acid is easily absorbed by the connective tissue facilitating the reparative and reconstructive process. Placing itself in the connective space of the amorphous matrix in the form of an aggregate reticulum able to absorb and store a large number of water molecules, it guarantees the degree of hydration, turgidity, plasticity and viscosity indispensable for the maintenance of a young skin. As a shock-effect molecule, it compacts tissues, remedying the signs of aging and preventing cells' damage directly from inside the tissues.

DIRECTIONS FOR USE: Make a deep facial cleansing, then apply the TNT mask making it stick well in all its parts. Hold for 10 minutes. Then remove the fabric and gently massage any residues. Single-use product.
