PURPLE MASK
Restoring
Resveratrol, Grape Stem
Cells, Regu[®]Scence
Mature skins

Format 100 ml
Cod. 1030020111

Restoring and antioxidant peel-off face mask. Formulated with Resveratrol, Plant Stem Cells and latest generation patented actives, it effectively counteracts all signs of skin aging such as wrinkles, expression lines, loss of tone and firmness by bringing the clock hands back. Its particular texture creates an occlusive effect allowing the active ingredients to penetrate more easily and to act in the deeper layers of the dermis. Ideal for mature skin.

RESVERATROL

Is one of the most powerful molecules to fight skin aging such as wrinkles, expression lines, loss of tone and firmness. Its proven ability to penetrate the skin barrier allows it to act and perform its important reparative, protective and stimulating activity in the deeper layers of the skin. It stimulates the proliferation of fibroblasts

and contributes to an increase in the concentration of collagen in the dermis. Activates the production of sirtuin (SIRT-1), longevity protein, promotes cellular metabolic events, stimulating the repair of damaged DNA and prolonging cell life. It rejuvenates, energizes, increases elasticity and, thanks to its "retinol-like" action, reduces the number and depth of consolidated wrinkles. Resveratrol is also known for its proven antioxidant, anti-inflammatory and protective properties. Among the polyphenolic molecules, it is the most effective for protecting the skin against the deleterious effects of cellular stress. Several studies have demonstrated its ability to protect cells from oxidative damage associated with the effects of free radicals and UV radiation on the skin, slowing down the photoaging process. Intervene in the pigmentation and melasma disorders, attenuating them, as well as on couperose redness, acne scars and chronological aging.

GRAPE STEM CELLS

Particularly rich in polyphenols, stimulate the natural ability of cells to regenerate and repair themselves following damage caused by oxidative stress. They penetrate easily into the dermis and have the surprising ability to integrate, through the cell differentiation process, with the epidermal ones with which they come into contact, helping them to perform their important function. They stimulate fibroblasts and the production of collagen and elastin, activate the biochemical processes of skin self-regeneration resulting in an important anti-wrinkle and skin rejuvenation action.

REGU[®]-SCENCE

Bioactive agent that significantly fights the loss of collagen and dermal tone. Its innovative and exclusive mechanism of action helps to reduce the visible signs of the natural cell aging process by moving the clock hands back. The *Asparagus officinalis* 'Grolim' of Navarra contains particularly high amounts of saponins, positive modulators that selectively remove damaged cellular components by stimulating a new production. Significantly attenuates the signs of skin aging, giving the skin a more compact and radiant appearance.

DIRECTIONS FOR USE: Spread a thin and uniform layer of mask on cleansed and dry face, leaving out eyes, eyebrows, nostrils and lips. Leave to dry for 20-30 minutes and gently remove from the face like a film. Remove any residue with a sponge soaked in water.
