● ACTIONS

- Decongestive.
- Regenerating.
- Moisturising.
- Antioxidant.
- Firming.

● ACTIVE INGREDIENTS

EPITENSIVE™ (PLANT-EGF): Plant-derived growth factor that stimulates the synthesis of collagen, elastin and other proteins, as well as extracellular regeneration. Also accelerates re-epithelialisation and skin repair processes.

HYALURONIC ACID (Sodium Hyaluronate): Hygroscopic active ingredient that preserves skin elasticity and firmness. Its moisturising and water-retention properties provide density, deep hydration and a plumping effect while preventing epidermal dehydration.

THIOCTIC ACID: Natural antioxidant that helps to combat free radicals. Generates an increase in skin microcirculation, boosting the supply of essential substances and improving skin decongestion.

FERULIC ACID: Antioxidant that neutralises free radicals and prevents cell damage, counteracting photoaging. Helps preserve the cellular matrix of tissues and protects the dermis.

SEAWATER (Maris Aqua): The high concentration of mineral salts in Seawater is rich in minerals and trace elements, which provide resilience to the most damaged tissues.

PUMPKIN SEED EXTRACT (Curcubita Pepo Seed Extract): Pumpkin Seed Extract is rich in enzymes that stimulate the regeneration of the outermost skin layers.
