● **062 FIRMING REAFFIRMING FACE CREAM**

Ref: 10662

● DESCRIPTION

Facial rejuvenating cream with an intense firming and facial contour-restoring action that improves skin structure and elasticity.

● ACTIONS

- Firming.
- Plumping.
- Tightening.

● ACTIVE INGREDIENT

TENS'UP™: Cosmetic active ingredient combining structure and technology, forming a three-dimensional matrix of galactomannans and trace elements, which act on the skin's surface, forming a film with an immediate and long-lasting tightening effect.

MATRIXYL® 3000: Helps to activate the skin repair process. Matrikines are peptides that activate cellular functions, especially cell proliferation, and thus collagen and elastin synthesis, improving skin structure and elasticity.

HYDROLYSED COLLAGEN (*Soluble Collagen*): Bio-Marine Collagen 6 is a high-purity soluble collagen of marine origin. Increases the formation of fibrous proteins that will form the support fibres of the outermost skin layers, providing resilience and suppleness.

HYDROLYSED ELASTIN: Improves the skin's biodynamic properties, enhancing its elasticity and delivering the necessary amino acids and peptides to increase elastin synthesis, thus reducing premature skin ageing.

ORGANIC SILICON (*Methylsilanol Mannuronate*): Forms part of the skin's natural connective tissue structure. Stabilises and maintains the architecture of skin tissues, stimulating fibroblasts and promoting collagen, elastin and proteoglycan biosynthesis. Improves skin elasticity and firmness, thus reducing fine lines and enhancing skin luminosity.

HYALURONIC ACID (*Sodium Hyaluronate*): Hygroscopic active ingredient that preserves skin elasticity and firmness. Its moisturising and water-retention properties provide density, deep hydration and a plumping effect while preventing epidermal dehydration.
