REPLENISHING FACIAL CONCENTRATE

Ref: 10605

● DESCRIPTION

Plumping facial concentrate for deep wrinkles, pronounced expression lines, and skin lacking density.

● ACTIONS

- Plumping.
- Redensifying.
- Moisturising.
- Decongestive.

● ACTIVE INGREDIENTS

LOW AND MEDIUM MOLECULAR WEIGHT HYALURONIC ACID (*Sodium Hyaluronate*): This combination provides both intense hydration to the deepest skin layers and restores optimal hydration levels, preventing water loss in the outermost layers. Helps diminish visible signs of ageing such as wrinkles and expression lines, especially those resulting from dehydration.

PANTHENOL: Calming and decongestive. Deeply moisturises the skin and has powerful regenerating and redensifying properties, stimulating self-healing processes.

UREA: Powerful skin-compacting effect. Prevents transepidermal water loss, improves deep hydration and thus preserves the essential substances that maintain tissue structure and provide skin resilience.

ACETYL HEXAPEPTIDE-51 AMIDE: Peptide complex that increases skin longevity and prevents the damage associated with the ageing process.
